## **FOREWORD**

This report is one of a series of provincial reports on the results of the 1980 Census of Population and Housing conducted on May 1, 1980.

Demographic data presented herein consist of population distributions according to age, sex, marital status, highest grade completed and literacy. Other bases as gainful occupation, industry and migration are included likewise.

In the other aspect of the census, the following housing characteristics are considered: type of building, structural characteristics, floor area, type of tenure, use and source of water supply, lighting, type of toilet facilities, kind of cooking fuel used and appliances.

Subsequent issues will be the National Summary (Volume II) containing summary data on the final provincial reports and the Special Volume on National Capital Region (Metro Manila Area) which will cover data on the social, economic and demographic characteristics of the region.

Grateful acknowledgment is due the National Census Coordinating Board, government agencies, committees and the local coordinating boards for their invaluable assistance and cooperation.

TITO A. MIJARES

# **Explanatory Text**

## **GENERAL**

### **INTRODUCTION**

The National Census and Statistics Office conducted in May 1980, the 1980 Census of Population and Housing. This type of Census was also undertaken in May 1970. In May 1975 the Census of Population was taken as Phase I of the 1975 Integrated Census of the Population and Its Economic Activities. This nationwide undertaking was designed to obtain comprehensive data on the size, distribution, structure, change and socio-economic characteristics of the population and to take inventory of the housing accommodations, their geographic location, structural characteristics, available facilities, etc.

The population report contains data gathered from private households as well as collective households, while data on housing were collected from private households only.

It should be emphasized at this point that a complete enumeration of all households throughout the country was made but only sample household questionnaires representing 20 percent of the listed households were processed and the data published in this volume. In so doing, however, the total population count by barangay, male and female, obtained from the listing sheet taken simultaneously during the enumeration was maintained in computing the weights or expansion factors. It should also be noted that data on Tables 1 to 4 of the population tables refer to total population, that is, the population of the private households plus the collective households while Tables 5 to 10 cover exclusively the private household population.

Pursuant to the provision of Batas Pambansa Bilang 72, a final count of the population, by sex at barangay level was submitted to the President and was approved under Proclamation No. 2170 dated March 12, 1982. This report was published separately in 74 provincial volumes.

### **AUTHORITY FOR THE 1980 CENSUS**

Under Commonwealth Act No. 591, the National Census and Statistics Office is authorized "to prepare for and undertake all censuses of population, agriculture, industry and commerce."

It may be mentioned in this regard that sometime in February 1980 Parliamentary Bill No. 809 was presented at the Batasang Pambansa, providing for the taking of an integrated census every ten years beginning 1980, with May 1 of every census year as the reference date. This bill was approved into Batas Pambansa Bilang 72 on June 11, 1980, more than one month after the start of enumeration.

### **INTER-AGENCY PARTICIPATION**

The expertise and technical advice of the National Economic and Development Authority Inter-Agency Committee on Population and Vital Statistics and its Technical Working Group on 1980 Census of Population and Housing played a vital role in the successful undertaking of the census.

The Committee's main function was to review the questionnaire, methodologies, concept, tabulation and other related aspects of the census in the production of data and development of systems that would produce more reliable and accurate result. It had for its chairman the Dean of the University of the Philippines Population Institute (UPPI) and for its members, one representative each from the Ministries of Human Settlements (MHS), National Defense (MND), Education and Culture (MEC), Health (MOH) and Local

## EXPLANATORY TEXT

Government and Community Development (MLGCD); the Commission on Population (POPCOM); National Economic and Development Authority (NEDA); and two representatives from the National Census and Statistics Office (NCSO). The Technical Working Group (TWG) for the 1980 Census of Population and Housing was headed by the Chief of the National Census and Household Surveys Department of NCSO and the members were representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, and the National Housing Authority (NHA).

Recommendations were likewise solicited from other government agencies for questions that should possibly be included in the population and housing portions in order to fill their data needs.

As early as August 1977, an NCSO Technical Committee for censuses was created. Ranking officials of the National Census and Statistics Office comprised the committee, with the Assistant Executive Director as Chairman, the Chief of the National Census and Household Surveys Department (NCHSD) as Vice-Chairman and Heads of six other departments and staff offices as members.

The committee coordinated with the Inter-Agency Committee and TWG of the NEDA on the technical aspect of the census and rendered a monthly progress report to the Executive Director. It provided the overall direction of the activities of the different subcommittees on census. The two subcommittees created, the Sub-Committee on Population and Housing Census and the Sub-Committee on Operations and Logistics Support, were directly charged with the preparatory work for the census undertaking.

### CENSUS BOARDS

A systematized involvement of government agencies and instrumentalities was made possible largely through the concerted efforts of the members of the National Census Coordinating Board (NCCB) and the Provincial, City and Municipal Census Boards. The national board was created by NEDA Memorandum Order No. 4-80, dated April, 1980 and the local boards, by Memo Order No. 5-80, dated April 1, 1980, by virtue of the powers vested in the Minister of Economic Planning under Section 3 of Presidential Decree No. 1200.

The NCCB was headed by the Minister of Economic Planning as Chairman with the Executive Director as Executive Officer. Named as members were the Ministers of Agriculture, Budget, Education and Culture, Finance, Human Settlements, Public Works, Justice, Labor, Local Government and Community Development, National Defense, Natural Resources, Public Highways, Public Information and Transportation and Communication. Rules and regulations necessary for the successful undertaking of the census were issued by the Board.

At the local government level, similar functions were carried out by the Provincial City and Municipal Census Boards. The Provincial Governor headed the Provincial Census Board while the Division Superintendent of Schools was Vice-chairman. Members were the Highway District Engineer, Provincial Auditor, Provincial Commander of the Philippine Constabulary, the Provincial Development Officer and the Provincial Agriculturist. The City Census Board was composed of the City Mayor as Chairman; City Superintendent of Schools, Vice-chairman; and the City Engineer, City Assessor and City Development Officer, members. Finally, the Municipal Census Board had for its Chairman the Municipal Mayor and ably assisted by the District Supervisor as Vice-chairman. The members were the Municipal Agriculturist, Station Commander, Municipal Treasurer and the Municipal Development Officer.

## **EXPLANATORY TEXT**

For each of these local census boards, the Provincial Census Officer, City Census Officer and the Municipal Census Officer were designated Executive Officer of their respective Board.

### **CENSUS ORGANIZATION**

The overall direction and instructions for the census undertaking emanated from the Executive Director of the National Census and Statistics Office or in his absence, the Assistant Executive Director.

Assisted by the Task Force from the Central Office and in coordination with the local census boards, the Regional Census Officers and the Provincial Census Officers directly supervised the field operations in their respective areas. The services of District Supervisors, Head Teachers and elementary school teachers from public schools were utilized as City/Municipal Census Supervisors, Team Supervisors and Enumerators in that order.

During the field operations, the 1980 Census Operations Center under the overall supervision of the National Census and Household Surveys Department Chief, was the operating body that monitored the overall operations. Lending support to the center were the Administrative and Fiscal Services Staff.

### **METHOD OF ENUMERATION AND USE OF SAMPLING**

The household was used as the enumeration unit and a complete listing of dwelling units, including vacant ones, was done.

A combination of complete enumeration and sampling was adopted. While all households were asked on the count of the population and housing characteristics, only twenty percent (20%) were asked on other characteristics. The selection of sample households was done systematically with a random start from a listing of households which was prepared simultaneously with the enumeration.

Using PH Form 2 (Common Private Household Questionnaire) and with an 80 percent coverage, the items asked on population were household membership, relationship to head, line number of mother, sex, date of birth, age as of last birthday and marital status. For the housing items, the type of building and the construction materials of roof and outer walls, number of rooms, floor area of the dwelling unit and the year the building was built were asked.

In addition to the population and housing items just mentioned, additional information were asked using PH Form 3 (Sample Private Household Questionnaire) from the 20 percent samples such as language or dialect generally spoken at home, citizenship, usual residence of mother at person's birth, residence of person in 1975, ability to speak Pilipino and English, school attendance, highest grade completed, literacy, economic activity of the person, place of schooling or work, fertility, nature of occupancy of the dwelling unit and housing facilities and conveniences.

Collective households were enumerated using PH Form 4, where the information asked were the same as those in PH Form 2, excluding housing items.

### **PLACE WHERE ENUMERATED**

All persons were enumerated in their usual place of residence, which is the geographic place (street, barangay, sitio, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he usually sleeps; therefore, it may be the same as or different from the place where he was found at the time of the census.

## EXPLANATORY TEXT

### **POST ENUMERATION SURVEY**

Originally the plan was to conduct a Post Enumeration Survey covering the whole country. For lack of funds the survey had to be confined to Metro Manila. Its purpose was to determine the extent of underenumeration or overenumeration in the 1980 Census of Population and Housing.

A sample of 132 barangays was selected. However, in 59 barangays which were divided into two or more enumeration areas (EAs), an enumeration area was chosen as sample.

A complete listing was made of households in the sample barangays/EAs using PH Form 1-B. Twenty percent of these households were selected as sample households and interviewed using PH Form 2, which was the same questionnaire used for non-sample households during the main enumeration. The housing portion of this form was disregarded.

### **CONTENT AND COVERAGE OF THE PUBLICATION**

In this publication, the population and households were described according to the respective items listed below:

Population Items	Housing Items
Age	Type of Building
Sex	Type of Occupancy
Marital Status	Construction Materials of Roof and Outer Walls
Highest Grade Completed	Year Built
Literacy	Floor Area of Dwelling Unit
Language/Dialect Spoken in the Household	Tenure of Owner-Occupant with Respect to the Land
Gainful and Non-Gainful Occupation	Kind of Lighting Facilities
Major and Minor Industry	Use and Source of Water Supply
Migration	Type of Toilet Facilities
	Kind of Cooking Fuel
	Household Appliances

The above items are presented in the ten population tables and nine housing tables of this report.

Except for figures on total population and sex, all other characteristics were based on a 20 percent sample.

Aside from these published tables, 10 other tables on the above characteristics plus 6 statistical tables dealing on ever-married women 15 years old and over are also available to statistical users.

### **DEFINITION OF TERMS AND CONCEPTS**

#### **I – POPULATION**

##### **BARANGAY**

A barangay is the smallest political unit in the country and generally its enumeration is

## **EXPLANATORY TEXT**

assigned to one enumerator. For enumeration purposes, a large barangay is usually split into parts and each part is called an enumeration area (EA).

### **ENUMERATION AREA**

An enumeration area (EA) is a delineated area assigned to one enumerator, usually consisting of about 300 households. A barangay or part of a barangay may have been designated as an enumeration area.

### **URBAN AND RURAL AREAS**

The same concepts used in the 1970 and the 1975 Censuses were followed in classifying areas as urban. According to these concepts, urbanized areas consist of:

1. In their entirety, all cities and municipalities having a population density of at least 1,000 persons per square kilometer.
2. Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
3. Poblaciones or central districts (not included in 1 and 2), regardless of the population size, which have the following:
  - a. Street pattern, i.e., network of streets in either parallel or right-angle orientation;
  - b. At least six establishments (commercial, manufacturing, recreational and/or personal services ); and
  - c. At least three of the following:
    - 1) A town hall, church or chapel with religious services at least once a month;
    - 2) A public plaza, park or cemetery;
    - 3) A market place or building where trading activities are carried on at least once a week;
    - 4) A public building like a school, hospital, puericulture and health center or library.
4. Barangays having at least 1,000 inhabitants which meet the conditions set forth in 3 above, and where the occupation of the inhabitants is predominantly non-farming or fishing.

All areas not falling under any of the above classifications are considered rural.

### **PERSONS ENUMERATED IN A PRIVATE HOUSEHOLD**

The following were counted and enumerated as members of the household:

1. Persons whose usual place of residence is the place where the household lives and present at the time of visit of the enumerator, except those born after 12:01 A.M., May 1, 1980;
2. Persons whose usual residence is the place where the enumerated household lives, but temporarily away at the time of enumeration, such as:
  - a. persons temporarily away on vacation, business or pleasure trip or any other purpose in the Philippines who are expected to be back within six months,

## EXPLANATORY TEXT

- or within one year, if abroad;
- b. students who usually go home to their respective households at least once a week;
  - c. persons working elsewhere who usually go home to their respective households at least once a week;
  - d. patients confined in hospitals for not more than six months at the time of enumeration of the household, except those confined (1) as inmates (not patients in wards for temporary confinement) in tuberculosis pavilions; (2) in mental hospitals; (3) in leprosaria or leper colonies; and (4) in rehabilitation centers for drug addicts;
  - e. trainees in the Armed Forces of the Philippines, if their training is not more than six months;
  - f. convicts and detainees in provincial or municipal/city jails or military camps, who have been confined for not more than 6 months at the time of enumeration of the household, except those who have been sentenced for more than 6 months (including those whose sentence is on appeal), even though just confined; and
  - g. officers and crew members of coastal, interisland, or fishing vessels; officers and crew members of ocean-going vessels who usually go home to their household at least once a year.
- 3. Boarders of the household who are working, looking for work or studying, and who do not go home at least once a week;
  - 4. Employees of household-operated enterprises who eat and sleep with the household and who do not go home at least once a week;
  - 5. Persons (other than those in "3" and "4") whose usual place of residence is elsewhere, but who have been away from their usual place of residence for more than 6 months;
  - 6. Members of the Armed Forces of the Philippines including draftees, sleeping most of the nights with the household, except those who only board or lodge with the household and who usually go home at least once a week; in such a case, they will be enumerated in their own household;
  - 7. Persons found in the household who have no usual place of residence elsewhere;
  - 8. Persons found in the household who are not certain of being enumerated elsewhere;
  - 9. Persons who consider the dwelling unit of the household as their usual place of residence but are living within the premises of a foreign embassy, ministry, legation or consulate, including non-Filipino employees who have been residents of the Philippines before such employment;
  - 10. Citizens of foreign countries and Filipinos (balikbayan) who have resided or expect to reside in the Philippines for more than one year from arrival;
  - 11. Persons who sleep in the same dwelling unit but may not be able to take all or some of their meals with the household because of the nature of their work or other similar reason (they take their meals at place of work, etc.), should be considered as part of the household; and
  - 12. A household member who is alive as of 12:01 A.M., May 1, 1980, but dies prior to the enumeration of the household.

## EXPLANATORY TEXT

### **PERSONS TOTALLY EXCLUDED FROM THE ENUMERATION**

Totally excluded from the population count of the Philippines were:

1. Foreign ambassadors, ministers, consuls or other diplomatic representatives, and members of their households (except Filipino employees and non-Filipino employees who had been residents of the Philippines prior to said employment);
2. Citizens of foreign countries living within the premises of an embassy, legation, chancellory or consulate;
3. Officers and enlisted men of U.S. Military or Naval Forces and non-Filipino members of their households, irrespective of residence; foreigners who are civilian employees in U.S. military or naval stations and member of their families living within the premises of said stations or reservation; (Note: for foreigners who are civilian employees of said stations living outside the station or reservation, see Item 5).
4. Citizens of foreign countries who are Chiefs and officials of international organizations like UN, ILO or USAID, who are subject to reassignment to other countries after their tour of duty in the Philippines, and members of their families;
5. Citizens of foreign countries together with non-Filipino members of their families, who are students or who are employed, or have business in the Philippines and have been in the Philippines or expect to stay in the country for one year or less from arrival;
6. Citizens of foreign countries and Filipinos with usual place of residence in a foreign country, who are visiting in the Philippines and expect to stay in the country for one year or less from arrival (e.g. a *balikbayan* who will return to his usual place of residence abroad after a short vacation or visit in the Philippines);
7. Citizens of foreign countries in refugee camps/vessels; and
8. Residents of the Philippines on vacation, pleasure or business trip, etc. abroad, who have been away or expected to be away from the Philippines for more than one year from departure.

### **USUAL PLACE OF RESIDENCE**

The term refers to the geographic place (street, sitio, barrio/barangay, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he sleeps most of the time; hence, it may be the same as or different from the place where he was found at the time of the census.

### **HOUSEHOLD**

A household usually consists of a group of persons who sleep in the same dwelling unit and have common arrangements for the preparation and consumption of food. A person who lives alone is considered as one separate household. Although in most cases a household consists of a related family group, some household members may have no relationship to the central group. Boarders and servants, for instance are counted as part of a particular household if they take their meals with the household and sleep in the same dwelling unit. Persons who sleep with a household but individually cook their meals or eat elsewhere are each considered as single-person household.

## EXPLANATORY TEXT

Three generations may be living in one dwelling unit. If they are divided into two or more groups whose eating arrangements are independent from each other, each group is counted as a separate household.

### **PERSONS NOT LIVING IN HOUSEHOLD**

Falling under this category are persons living in collective living quarters such as welfare institutions (orphanages and homes for the aged or infirm); penal and corrective institutions (jails, national penitentiary, and reformatory institutions); hospitals, sanatoria, leprosaria, and nurses homes; dormitories and boarding schools; lodging houses such as hotels, tourist homes and the like; military camps and others.

Most of these institutions house inmates for whom care or custody is provided by resident staff members, or persons residing in group quarters or in housing units on the institutional grounds.

Private families living within such institutions, however, are excluded from the classification, as well as persons (employees, students, etc.) who go home to their families on weekends or days off. Persons found in lodging houses, but who are on vacation or business trips and whose absence from home does not exceed six months on the day of enumeration, are likewise not counted as part of the institutional population.

### **RESPONDENT**

A respondent is any responsible adult member of the household who furnished the information or answers to questions during the interview.

### **LANGUAGE/DIALECT GENERALLY SPOKEN IN THE HOUSEHOLD**

This refers to the language or dialect spoken most of the time by members of the household. In cases where two or more languages/dialects are spoken by household members, the one most often used in conversations among members of the family of the head when most of them are gathered together is considered as the language/dialect generally spoken in the household.

### **HEAD OF HOUSEHOLD**

The person responsible for the care and organization of the household is generally considered as the head of the household. He usually provides the chief source of income for the household.

In the case of a household consisting of two or more unrelated persons sharing a dwelling unit and sharing the same cooking facilities and meals, the head is usually the eldest male or female in the group regarded as such by the other members.

### **RELATIONSHIP TO HEAD OF HOUSEHOLD**

This determines how each household member is related to the head, who is usually the husband or father, although in his absence or if incapacitated, the wife may be designated as head.

1. Spouse – a woman/man married to and living with the head. This includes legal marriages as well as common-law relationships.
2. Son/daughter – the head's own child, stepchild, or adopted child.

## **EXPLANATORY TEXT**

3. Son-in-law/daughter-in-law – refers to a household member related to the head by marriage to his daughter or son.
4. Grandson/granddaughter – child of the son or daughter of the head.
5. Other relative – a household member related to the head by blood, marriage, or adoption. Father, mother, aunts, nephews, parents-in-law and cousins are examples.
6. Others – any person in the household who is usually a non-relative of the head. Boarders and servants fall under this category. Certain members of the household who are related to the head by blood or affinity, but are actually boarders or servants in the household, are classified under “Others”.

For collective households and group quarters, the question on relationship refers to the person's relationship to the institution or establishment, and not to the person recorded as head.

### **AGE AND DATE OF BIRTH**

Data on the age of the population were obtained by asking the respondent the month and year of birth and the age itself of the household member before May 1, 1980. To ensure accuracy, a conversion table on age before May 1, 1980 was prepared for the use of enumerators, editors/coders and verifiers.

### **MARITAL STATUS**

This refers to the civil status of all persons 10 years old and over. A person in this age group is classified as single, married, widowed, separated or divorced, or civil status unknown, based on the following definitions:

- a. Single – If never been married.
- b. Married – Legally married or living consensually with husband/wife without benefit of a legal marriage. A person classified as “married” includes one who remarried after having been widowed, separated or divorced or one temporarily separated from spouse owing to the nature of work, illness or service in the Armed Forces.
- c. Widowed – A person whose spouse died and who has not remarried at the time of enumeration.
- d. Separated – If permanently separated from spouse either legally or otherwise, due to marital discord.
- e. Divorced – If bond of matrimony has been dissolved through a court decree and is therefore free to remarry.
- f. Unknown – If civil or marital status is either not known to the respondent, or the respondent himself refuses to reveal the marital status of such person.

### **CITIZENSHIP**

Citizenship is defined as the legal nationality of a person. A citizen is a legal national of the country of the census; an alien is a non-national of the country.

### **LITERACY**

A person is considered literate if he is able to read and write a simple message in any language or dialect.

## **EXPLANATORY TEXT**

### **HIGHEST GRADE COMPLETED**

This has reference to the specific grade or year completed in elementary school, high school, college or university, by persons 7 years of age and over. Academic degree holders are classified according to the title of the degree received or the major field of study undertaken.

### **USUAL OCCUPATION**

This refers to the specific job or kind of work that a person, who works most of the year, is usually pursuing, or if unemployed at the time of enumeration, it is the kind of work he used to do most of the year. A person is considered as usually working most of the year if he works for at least 10 hours a week for 26 weeks either for pay in cash or in kind, for a fee or profit in own farm, business or establishment or practice of a profession and without pay on family farm or enterprise. This particular group of workers is referred to as gainful workers.

For persons who do not work most of the year, the usual occupation relates to the non-gainful activities they usually do most of the year. Among such persons are housekeepers, students, pensioners, retired and disabled. However, a person who is housekeeping or schooling and also works in a gainful activity was reported as gainfully employed, even if more time was spent housekeeping or studying, as the case may be.

### **INDUSTRY**

Industry refers to the specific character and nature of business or industry or the place where the work is being performed in connection with the job or occupation reported for a person.

### **EVER-MARRIED WOMAN**

This refers to a woman who has already entered married life. Marriage here may either be legal or consensual union. At the time of enumeration the ever-married woman may still be married, or already widowed, separated or divorced.

## **II – HOUSING**

### **BUILDING**

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls with adjacent building which usually extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another. A building therefore, is any structure intended for dwelling, storage, factory, shelter or for some other useful purposes.

For purposes of the 1980 Census of Population and Housing, only the following buildings were listed and assigned building serial numbers:

- a. A house or any kind of building or shelter where people were actually living;
- b. A residential building (house, apartment or accesoria, condominium) that was vacant;

## EXPLANATORY TEXT

- c. Hotel, motel, lodging house, dormitory or camp (construction, logging, mining, etc.) in operation;
- d. A commercial, office, industrial, agricultural or other kinds of buildings with one or more dwelling units (containing a kitchen/kitchen-dining room, living room and a bedroom, and with separate entrance) which were all vacant.

The different types of buildings are:

- 1. Single house – a complete structure intended for one household. It includes the so-called “nipa hut” or a small house that is built as a more or less permanent dwelling unit.
- 2. Duplex – a structure intended for two households, with complete living facilities for each. It is divided either vertically or horizontally into two separate dwelling units which are usually identical.
- 3. Apartment/accesoria/condominium/row house

An apartment is a structure usually of several stories, made up of three or more independent entrances from internal halls or courts. It differs from an accesoria in that an apartment has one common entrance from the outside.

An accesoria is usually a one or two-floor structure divided into three or more dwelling units, each dwelling unit having its own separate entrance from the outside. Another name for accesoria is row house.

A condominium is usually a high-rise building where the dwelling units are owned individually but the land and other areas and facilities are owned in common.

- 4. Improvised (barong-barong) – a makeshift or roughly constructed house usually built with salvaged materials.
- 5. Commercial/industrial/agricultural – buildings not intended for human habitation but used as dwelling units at the time of the census.

Commercial – a building used for transacting business or rendering professional services, such as a storage or an office building.

Industrial – a building used for processing, assembling, fabricating, finishing, manufacturing or packaging operations, such as a factory or a plant.

Agricultural – any structure used for agricultural purposes, such as a barn, warehouse, rice mill, etc.

- 6. Other housing unit (natural shelter, boat, etc.)

This refers to living quarters which are not intended for human habitation nor located in permanent buildings but which are, nevertheless, used as living quarters at the time of the census. Caves, other natural shelters and mobile housing units such as trailer, barge, boat, etc., fall within this category.

- 7. Hotel, lodging house, dormitory, etc. – This group comprises permanent structures which provide lodging and/or meals on fee basis. Hotels, motels, inns, boarding houses, dormitories, pensions and lodging houses fall within this category.
- 8. Institutional (hospital/convent/school dormitory/penal institution, etc.) – a building intended for persons confined to receive medical, charitable, or other care treatment such as jails and penal colonies, and other buildings like convents, school dormitories, etc.
- 9. Other collective living quarters – any structure or shelter which does not fall under items 7 and 8. Included in this category are camps which are defined sets of

## EXPLANATORY TEXT

premises originally intended for the temporary accommodation of persons with common activities or interests like military camps, and other camps established for the housing of workers in mining, agriculture, public works or other types of enterprises.

### DWELLING UNIT

A dwelling unit is a separate and independent place of abode intended for habitation by one household, or one not intended for habitation but occupied as living quarters by a household at the time of the census.

Dwelling units counted included those that are occupied and those that are unoccupied.

### CONSTRUCTION MATERIALS OF ROOF

The kinds of materials used are as follows:

1. Galvanized iron/aluminum
2. Tile/concrete/brick/stone
3. Asbestos
4. Cogon/nipa
5. Makeshift/salvaged materials
6. Others (anahaw, etc.)

### CONSTRUCTION MATERIALS OF OUTER WALLS

The kinds of materials may be any of the following:

1. Galvanized iron/aluminum
2. Tile/concrete/brick/stone
3. Wood/plywood
4. Mixed tile/concrete/brick/stone and wood/plywood
5. Asbestos
6. Bamboo/sawali
7. Cogon/nipa
8. Makeshift/salvaged materials
9. Others (anahaw, etc.)

If the roof or outer walls are constructed of two or more materials the material most used was reported.

### YEAR BUILDING WAS BUILT

This refers to the year when the extent of construction permitted occupancy for living purposes. The year reported was the particular year when the occupancy started or when the building was fit for occupancy even if not occupied.

### NUMBER OF ROOMS IN THE DWELLING UNIT

A room is defined as a space in a dwelling unit or other living quarters enclosed by walls reaching from the floor to the ceiling or roof covering, or at least to a height of 1.8 meters which are of permanent or semi-permanent structure, of a size large enough to hold a bed for an adult or at least has an area of 3 square meters.

## **EXPLANATORY TEXT**

The total number of rooms reported included the bedrooms, dining room, living room, kitchen, roofed veranda, library or music room and other separate spaces used or intended for dwelling purposes, as long as they meet the criteria of walls and floor space. Passageways, lobbies, bathrooms and toilets or rooms used exclusively as store/shop/clinic/grains storage (nobody sleeps therein) were not counted as rooms even if they meet the criteria.

## **FLOOR AREA OF DWELLING UNIT**

This refers to the space enclosed by the exterior walls of the dwelling unit, or the space measured inside the outer walls of the spaces that are counted as rooms. In case of several floors, the area of each floor in square meters was taken and added together to get the total floor area of the dwelling unit. Areas of floor spaces that are not considered rooms such as bathroom, toilet, storeroom, passageway were excluded in determining the floor area.

# **National Capital Region (Metropolitan Manila): A Brief Analysis**

The growth of the National Capital Region (NCR), popularly known as Metropolitan Manila is the most significant urban development during the last 30 years or so. Since the end of World War II, specifically after 1960, a rapid growth of the four contiguous cities (Manila, Caloocan, Pasay and Quezon) and the municipalities around them has been observed. These areas have become the country's political, economic and educational center. However, it was not until 1975 that a serious attempt was made to integrate the areas' local governments so that their functions and powers could cope with the country's present problems and realities. On this basis, the residents of the Greater Manila area voted in a referendum to create a central metropolitan authority.

On November 7, 1975, President Ferdinand E. Marcos promulgated Presidential Decree No. 824 creating the Metropolitan Manila Area with the status of a public corporation and providing for a manager-commission type of government for the integrated cities and towns of Metropolitan Manila.

Pursuant to the provisions of said decree, the Metro Manila Commission (MMC) becomes the central government authority empowered to administer the area. As constituted at present, the MMC is headed by a governor who is the chief executive and chairman of the commission. There is also a vice-governor to assist and advise the governor on the commission's activities and policies. The governor and the vice-governor also function as the general manager and deputy general manager of the commission, respectively.

On June 2, 1978, Presidential Decree No. 1396 was promulgated amending Presidential Decree No. 824. Section 3 thereof provided for the establishment of the Metropolitan Manila Area as the National Capital Region, the administration of which is vested in the Ministry of Human Settlements.

The NCR as provided by law consists of the four cities of Manila, Quezon, Pasay and Caloocan and the 13 municipalities of Makati, Malabon, Mandaluyong, Marikina, Muntinlupa, Navotas, Las Piñas, Parañaque, Pasig, Pateros, San Juan, Taguig and Valenzuela. It is located along the flat alluvial and deltaic land from the mouth of Pasig River to the higher rugged lands of Marikina Valley on the east and bounded by Manila Bay on the west, Rizal province on the east, Bulacan province on the north, Cavite province on the southwest and the province of Laguna on the south and southeast. The Pasig River cuts through the area from the south flowing in through the east and winding up in the west. It has a total land area of 636.0 square kilometers which is less than 0.5 percent of the total land area of the country.

## A BRIEF ANALYSIS

The NCR is characterized by the concentration of economic, social and political activities as evidenced by the presence of 90 out of the 100 biggest corporations in the country, all of the major newspapers, all of the main television stations and 60 percent of the country's non-agricultural labor force. The area serves as the distribution center for exports and capital goods. In addition, about 90 percent of the internal revenue collections for the entire country are taken from the area and almost 80 percent of national imports enter through the ports in the City of Manila. The NCR is also the nation's center for non-primary production, providing almost one-half of the total national output in manufacturing, commerce and services.

Undoubtedly, the NCR is the only region in the country that is entirely urban.

### POPULATION

The population of the National Capital Region totalled 5,925,884 on May 1, 1980, representing an increase of 955,878 or 19.23 percent over the 1975 figure. It ranked second among the 13 regions of the country in population, behind Region IV (Southern Tagalog) which has a land area around 74 times larger than that of the NCR. However, the net population gain of nearly a million people during the 1975-80 intercensal period was unequaled underscoring more than anything else the continued pouring into the region of a considerable number of migrants from the provinces.

The people of the NCR were unevenly distributed among its cities and municipalities. The City of Manila, encompassing only 6.02 percent of the NCR's total land area, held the largest population with 1,630,485 inhabitants constituting 27.52 percent of its total population. Quezon City which occupies the biggest portion (26.13%) followed with 1,165,865 or 19.67 percent. With 467,816 or 7.89 percent, Caloocan ranked third; fourth, the town of Makati (372,631 or 6.29%) and fifth, Pasay City (287,770 or 4.86%). These five areas when combined together accounted for nearly two-thirds (66.23%) of the total population of the NCR. The shares of the remaining municipalities to the total population are as follows: Pasig, 4.53 percent; Valenzuela, 3.58 percent; Marikina, 3.57 percent; Parañaque, 3.52 percent; Mandaluyong, 3.47 percent; Malabon, 3.22 percent; Muntinlupa, 2.31 percent; Las Piñas, 2.30 percent; Tagig, 2.26 percent; San Juan, 2.20 percent; Navotas, 2.13 percent and Pateros, 0.68 percent.

Quezon City posted, however, the largest absolute increase (209,001) during the 1975-80 intercensal period which enabled its population to shoot up past the one-million mark. It accounted for more than one-fifth (21.86) of the NCR's net population gain. The City of Manila contributed 15.84 percent to the region's absolute increase; Caloocan, 7.39 percent; Valenzuela, 6.46 percent; Tagig, 6.32 percent; Pasig, 6.14 percent; Las Piñas, 5.74 percent; Parañaque, 5.19 percent; Marikina, 4.51 percent; Muntinlupa, 4.41 percent; Makati, 3.99 percent; Pasay, 3.43 percent; Navotas, 3.04 percent; Mandaluyong, 2.42 percent; Malabon, 1.69 percent; San Juan, 0.79 percent and Pateros, 0.78 percent (Table 1).

It is interesting to note that the NCR's surpassing the much larger 12 other regions in net population gain came despite a marked deceleration in the growth of its population. From 4.61 percent during the 1970-75 intercensal period, the average annual geometric growth rate fell to 3.58 percent during the 1975-80 period. There was a decline of more than one percentage point in the annual growth rate, but the growth of the NCR's population was still one of the fastest. Only Region XI or Southern Mindanao (4.28%) and Region IX or Western Mindanao (4.31%) had more rapid annual growth rates during the 1975-80 period. The pace of population growth widely varied among the four cities of

## A BRIEF ANALYSIS

Metropolitan Manila. It was fastest in Quezon City with an annual growth rate of 4.03 percent and slowest in Manila with 1.97 percent. Caloocan and Pasay grew by 3.33 and 2.45 percent, respectively. At 4.76 percent, the annual growth rate of the 13 NCR municipalities combined exceeded that of Quezon City. Individually, 9 towns increased more rapidly than the fastest-growing city, with Tagig surprisingly first on the list with a spectacular 12.72 percent annual growth rate that nearly doubled its population. Not far behind was Las Piñas which grew by 10.84 percent. The annual growth rates between 1975 and 1980 of the other municipalities, including those which did not outpace Quezon City, were: Muntinlupa, 7.65 percent; Valenzuela, 7.11 percent; Paranaque, 5.58 percent; Navotas, 5.37 percent; Pasig, 5.05 percent; Marikina, 4.67 percent; Pateros, 4.18 percent; Mandaluyong, 2.42 percent; Makati, 2.19 percent; Malabon, 1.78 percent and San Juan, 1.21 percent.

The National Capital Region had the highest population density among the country's 13 regions with 9,317.4 inhabitants per square kilometer. Its density increased from 7,814.5 inhabitants per square kilometer in 1975. Within the NCR, as the following table shows, congestion of people was most serious in Navotas at 48,517.7 inhabitants per square kilometer, followed by the City of Manila at 42,571.4, which previously posted the highest population density in 1975. Both densities are way above NCR's overall density. There were only four more areas aside from Navotas and Manila which had higher densities than the regional figure, namely: Pasay, 20,702.9; Pasig, 20,659.2, Makati, 12,462.6 and San Juan, 12,508.5. Places where people were less congested are: Tagig, 3,980.3; Pateros, 3,873.8, Las Piñas, 3,289.5 and Muntinlupa, 2,926.7.

**TABLE A – POPULATION DENSITY BY AREA, NATIONAL CAPITAL REGION  
(METROPOLITAN MANILA): 1975 AND 1980**

City/Municipality	Population Density	
	1980	1975
National Capital Region	<u>9,317.4</u>	<u>7,814.5</u>
Manila	42,571.4	38,619.2
Quezon City	7,014.8	5,757.3
Caloocan City	8,383.8	7,118.3
Pasay City	20,702.9	18,345.3
Las Piñas	3,289.5	1,966.5
Makati	12,462.6	11,185.6
Malabon	8,162.4	7,473.4
Mandaluyong	7,898.7	7,010.3
Marikina	5,439.9	4,330.4
Muntinlupa	2,926.7	2,024.9
Navotas	48,517.7	37,345.4
Paranaque	5,445.2	4,150.8
Pasig	20,659.2	16,147.3
Pateros	3,873.8	3,155.9
San Juan	12,508.5	11,778.1
Tagig	3,980.3	2,187.0
Valenzuela	4,518.4	3,204.4

A BRIEF ANALYSIS

The population of the NCR was composed of 3,070,172 females and 2,855,712 males – a sex ratio (number of males per 100 females) of 93.01. The sex ratio decreased from 95.69 in 1975, as females increased their predominance of the population during the 1975-80 intercensal period. Their share of the population increased slightly from 51.10 to 51.81 percent; that of the males subsequently dropped from 48.90 to 48.19 percent. During the same period, the number of females grew by 20.88 percent, compared with 17.51 percent for the males. All the four cities of Metropolitan Manila showed a surplus of females in their respective population. Caloocan reported the highest sex ratio at 97.50, while Quezon had the least at 90.30. Pasay and Manila had sex ratios of 94.61 and 92.42, respectively. On the contrary, a predominance of females was not a common trend among the 13 municipalities. Males outnumbered the females in Navotas and Muntinlupa registering sex ratios of 101.20 and 104.74, respectively. However, the rest of the municipalities had more females than males, the sex ratios ranging from as low as 87.34 in San Juan, 87.53 in Parañaque and 87.56 in Makati to as high as 96.70 in Malabon, 96.82 in Tagig, 97.32 in Pateros and 99.42 in Valenzuela.

## AGE COMPOSITION

Figure 1 shows that the age structure of the population deviates considerably from the pyramid shape generally observed in rural population. Both the male population and the female population fluctuate from the youngest age group 0-4 to 25-29 but progressively diminish from the age group 30-34 to the oldest age group 80 and over. The graph indicates that remarkable differences exist between the male and the female age structures, most notable of which is the 20-24 age group forming the largest group among the females.

## A BRIEF ANALYSIS

More than three-fifths (62.89%) of the total population of the NCR are 15-64 years old, a proportion higher than in most, if not all, other regions. Persons below 15 years of age constitute 34.72 percent and the elderly (those with ages 65 and over), a small 2.39 percent. These proportions are different from those in 1970 and 1975. As the next table shows, changes in the proportion of each of the three broad age groups during the 1975-80 intercensal period followed its trend in the 1970-75 intercensal period but varied in degree. The proportion of children under 15 years of age decreased by 2.38 percentage points (from 37.10% to 34.72%) during the recent five-year period. The same proportion declined by 2.48 percentage points during the earlier five-year period. There was a continued increase in the proportion of the 15-64 age group. It rose by 2.12 percentage points in 1975-80 after increasing by 2.33 percentage points in 1970-75. A continued growth was also exhibited by the elderly proportion, adding recently 0.26 percentage point more to its earlier gain of 0.15 percentage point. The population has a median age of 21 years, up from 19 years in 1975.

**TABLE B – AGE COMPOSITION OF THE POPULATION, NATIONAL CAPITAL REGION (METROPOLITAN MANILA): 1970, 1975 AND 1980**

Age Composition	1980		1975		1970	
	Number	Percent	Number	Percent	Number	Percent
Total	<u>5,925,884</u>	<u>100.00</u>	<u>4,970,006</u>	<u>100.00</u>	<u>3,966,695</u>	<u>100.00</u>
0-14 years	2,057,513	34.72	1,843,693	37.10	1,570,167	39.58
15-64 years	3,726,870	62.89	3,020,400	60.77	2,317,942	58.44
65 years and over	141,501	2.39	105,913	2.13	78,586	1.98

The population of the males is younger than the female population. Among the males, 36.72 percent are 0-14 years old; 61.08 percent, 15-64 and 2.20 percent, 65 and over. The corresponding figures for the females are: 32.86, 64.57 and 2.57 percent. Notably, the median age of the male population is the same as that of the female population (21 years).

Dependency ratio of the population as a whole is 59.00. It decreased from 64.55 in 1975 due to the increased proportion of the 15-64 age group.

### MARITAL STATUS

Close to one-half (48.45%) of the total population 10 years of age and older reported they were married; 47.58 percent were never married; 3.22 percent were widowed and 0.64 percent were divorced or separated. Table C shows that the never married and the married proportions, after displaying similar trends of slight increases during the 1970-75 intercensal period, underwent contrasting directions of change over the next intercensal period 1975-80 which resulted in a large reduction of the wide gap that occurred between these two biggest proportions in 1970 and 1975. The never married proportion, which was also the biggest in 1970 and 1975, decreased by 5.00 percentage points (from 52.58% to 47.58%) while the married proportion increased by 4.56 percentage points (from 43.89% to 48.45%). There was a growth of only 9.30 percent in the number of never married persons

## A BRIEF ANALYSIS

since 1975, a rate markedly slower than the 33.35 percent for those married. The proportions of the widowed and of those divorced or separated also rose during the 1975-80 period, the former by 0.23 percentage point and the latter by 0.15 percentage point. The widowed proportion had earlier declined from 3.38 to 2.99 percent during the 1970-75 period while the proportion of the divorced or separated made a hardly appreciable increase of 0.05 percentage point. In absolute terms, however, the population of the divorced or separated grew fastest since 1975 (57.10%) while the widowed grew by 29.73 percent.

A preponderance of never married persons was observed among the female population aged 10 and over, a proportion of 47.80 percent while the married ones comprised the majority (50.99%) of the male population. The females were most likely to be widowed and divorced or separated than the males. The proportion of widowed females reached 4.96 percent, four times as much as the 1.26 percent among males. A little less than one percent (0.92%) among females were divorced or separated, compared with only 0.32 per-

## A BRIEF ANALYSIS

cent for males. The growth of the never married persons since 1975 was the slowest for both the male and the female population, with the rate differing much between the two sexes (5.25% for the males and 13.14% for the females). The divorced or separated recorded the most rapid growth for males as well as for females, but the rate for the married and the widowed varied widely by sex. For the males, the number of those married grew since 1975 by 33.68 percent; widowed, 22.88 percent; and divorced or separated, 38.60 percent. The corresponding figures for the females were: 33.02 percent, 31.39 percent, and 63.95 percent.

**TABLE C – POPULATION 10 YEARS OLD AND OVER BY SEX  
AND MARITAL STATUS, NATIONAL CAPITAL REGION  
(METROPOLITAN MANILA): 1970, 1975 AND 1980**

Sex and Marital Status	1980		1975		1970

Not stated	2,931	0.12	1,206	0.06	1,400	0.09

### HIGHEST GRADE COMPLETED

The educational attainment of the population of the NCR had improved appreciably since 1975. As the succeeding table shows, the proportion of the private household population 7 years of age and older who had studied until high school rose from 32.26 to 34.46 percent, or a gain of 2.20 percentage points. Bigger gains were registered by the proportion of college undergraduates, jumping by 2.81 percentage points to 15.39 percent, and the proportion of academic degree holders, increasing by 2.69 percentage points to 12.04 percent.

## A BRIEF ANALYSIS

It was the population of the academic degree holders which posted the fastest rate of growth (52.87%) during the past five years, followed closely by the college undergraduates (45.31%) and those who had studied until the secondary level (26.81%). As in the other regions, persons who had reached only the elementary grades remained the largest single group, although their percentage share declined from 40.72 to 35.55 percent. This proportion and that of persons who had gone up to high school had sharply reduced their gap to less than two percentage points, a minor difference not found in the other regions. The NCR likewise succeeded in diminishing the number of completely unschooled persons, decreasing their proportion from 3.20 to 1.92 percent.

The population with elementary training were composed mostly of persons who finished the sixth and seventh grades (44.87%), followed by those who had attended no higher than the third grade (28.84%). Those who had completed the fourth and fifth grades constituted, respectively, 13.65 and 12.64 percent. Among persons with high school education, 51.36 percent were secondary graduates and 48.64 percent had not studied past third year. Nearly one-fifth (19.92%) of the college undergraduates had reached the fourth collegiate year or higher; 80.08 percent, at most the third year.

## A BRIEF ANALYSIS

**TABLE D – PRIVATE HOUSEHOLD POPULATION 7 YEARS OLD AND OVER  
BY HIGHEST GRADE COMPLETED, NATIONAL CAPITAL REGION  
(METROPOLITAN MANILA): 1975 AND 1980**

Highest Grade Completed	1980		1975	
	Number	Percent	Number	Percent
Total	<u>4,810,584</u>	<u>100.00</u>	<u>4,051,074</u>	<u>100.00</u>
No grade completed	92,384	1.92	129,611	3.20
Elementary	1,710,255	35.55	1,649,455	40.72
High school	1,657,442	34.46	1,307,044	32.26
College	740,352	15.39	509,512	12.58
Academic degree holder	579,250	12.04	378,922	9.35
Not stated	30,901	0.64	76,530	1.89

## A BRIEF ANALYSIS

### LITERACY

The NCR's literacy rate for the private household population 10 years of age and older was 96.60 percent, higher than that of any other region. Of the 4,430,246 people aged 10 and over in the metropolis, 45.67 percent were literate males, 50.93 percent, literate females; 1.33 percent, illiterate males and 2.07 percent, illiterate females.

### LANGUAGE OR DIALECT

At least 64 languages and dialects are spoken in the NCR but Tagalog, which could be considered indigenous in the area, is the most popular. Of the 1,103,563 total households in the metropolitan area, 93.09 percent generally speak Tagalog. Among the rest of the languages and dialects, the largest are: Ilocano, 1.52 percent; Lineyte-Samarnon (Waray), 0.96 percent; Chinese, 0.81 percent, Bicol, 0.80 percent and Hiligaynon (Ilongo), 0.56 percent.

### GAINFUL OCCUPATION

A total of 2,096,433 people at least 15 years of age have gainful work, representing more than half (54.68%) of the private household population 15 years of age and older and an increase from 1,606,263 in 1975. Males dominated the population of gainful workers outnumbering the females in a 5:3 ratio.

## A BRIEF ANALYSIS

The distribution of the total gainful workers in the last five years by major occupation group is given in Table E. As the table shows, the number of workers in all but one major occupation group has increased since 1975. The groups with increased employment, in the order of decreasing size, are as follows: the production and related workers, transport equipment operators and laborers, accounting for 35.43 percent of the total gainful workers; the service workers, 19.25 percent; the clerical and related workers, 12.62 percent; the sales workers, 12.41 percent; the professional, technical and related workers, 11.63 percent and the agricultural, animal husbandry and forestry workers, fishermen and hunters, 1.61 percent. However, of the six, only the professional, technical and related workers increased its proportion from 9.62 percent to 11.63 percent over the last five years. The respective proportions of the other five groups diminished, the decrease ranging from 0.42 percentage point for the agricultural, animal husbandry and forestry workers, fishermen and hunters (from 2.03% to 1.61%) to 1.28 percentage points for the production and related workers, transport equipment operators and laborers (from 36.71% to 35.43%). As a result of the decline in its number, the administrative, executive and managerial workers decreased its proportion relative to the total gainful workers from 3.39 to 2.43 percent. The number of gainfully working people who could not be classified under any of the major occupation groups increased to more than three-fold since 1975, and their proportion hiked from 1.73 to 4.62 percent. Undoubtedly, this tremendous growth largely caused the proportions of most of the major occupation groups with increased employment to fall.

**TABLE E – GAINFUL WORKERS 15 YEARS OLD AND OVER BY MAJOR OCCUPATION GROUP, NATIONAL CAPITAL REGION (METROPOLITAN MANILA): 1975 AND 1980**

Major Occupation Group	1980		1975	
	Number	Percent	Number	Percent
Total	2,096,433	100.00	1,606,263	100.00
Professional, technical and related workers	243,732	11.63	154,502	9.62
Administrative, executive and managerial workers	50,902	2.43	54,398	3.39
Clerical and related workers	264,654	12.62	219,565	13.67
Sales workers	260,179	12.41	206,593	12.86
Service workers	403,510	19.25	321,138	19.99
Agricultural, animal husbandry and forestry workers, fishermen and hunters	33,852	1.61	32,523	2.03
Production and related workers, transport equipment operators and laborers	742,761	35.43	589,706	36.71
Workers not classifiable by occupation	96,843	4.62	27,838	1.73

## A BRIEF ANALYSIS

### INDUSTRY

Two major industry groups combined have a work force representing more than one-half of the total gainful workers. These are community, social and personal services which alone employ 31.45 percent of the total gainful workers and manufacturing which accounted for 22.05 percent. Both major industry groups, however, experienced declines in their shares of the total gainful workers since 1975 despite registering employment increases during the intervening five years. Community, social and personal services claimed 38.64 percent of all gainful workers in 1975 and manufacturing, 25.14 percent. The other major industry groups contribute the following shares to the total gainful employment: wholesale and retail trade, 11.77 percent; transportation, storage and communication, 10.54 percent; financing, insurance, real estate and business services, 9.02 percent; construction, 6.73 percent; agriculture, fishery and forestry, 5.85 percent; electricity, gas and water, 0.85 percent and mining and quarrying, 0.28 percent. Only 1.46 percent are engaged in activities not adequately defined.

FIG. 6 – GAINFUL WORKERS 15 YEARS OLD AND OVER BY MAJOR INDUSTRY GROUP,  
NATIONAL CAPITAL REGION (METROPOLITAN MANILA): 1980

The largest major industry group, community, social and personal services, has three areas in which its workers are principally concentrated: personal and household services contribute around half (47.88%) of the group's total workers; public administration and

## A BRIEF ANALYSIS

defense, 16.24 percent and education services, 12.14 percent. The fields of concentration for workers in the manufacturing industry are: textile, wearing apparel and leather, 36.63 percent; fabricated metal products, machinery and equipment, 17.85 percent and food, beverage and tobacco, 14.26 percent.

### MIGRATION

At this point, the data user is cautioned that in the tabulation of the data on migration as presented in Table 10, the National Capital Region had been treated as a province.

A large majority of the private household population 5 years old and over (84.11%) resided in the same city/municipality where they had lived on May 1, 1975. The rest who had a different place of residence are distributed as follows according to where they previously resided on May 1, 1975: 4.62 percent, in another city or municipality of the NCR; 10.83 percent, in other provinces and 0.44 percent, in foreign countries. Among the males, only 14.69 percent changed residence, of which 4.56 percent stayed in another city or municipality of the NCR; 9.68 percent, in other provinces and 0.45 percent, in a foreign country. Comparatively, a higher 16.98 percent of the females shifted residence — 4.67 percent earlier resided in another city or municipality of the NCR; 11.88 percent, in other provinces and 0.43 percent, abroad.

### TYPE OF BUILDING

Table F shows that majority (63.69%) of the households in the NCR live in single houses. More than one-fifth (22.71%) occupy apartments/accesorias/condominiums/row houses/etc.; 6.99 percent, improvised houses; 5.30 percent, duplexes, and 1.13 percent, commercial/industrial/agricultural buildings. A small 0.09 percent reside in other housing units as natural shelters and boats; 0.05 percent, institutional buildings; 0.02 percent, hotels, lodging houses, dormitories and others and 0.02 percent, other collective living quarters.

TABLE F – NUMBER OF HOUSEHOLDS IN OCCUPIED DWELLING UNITS  
BY TYPE OF BUILDING, NATIONAL CAPITAL REGION  
(METROPOLITAN MANILA): 1980

Type of Building	1980	
	Number	Percent
Total	<u>1,103,563</u>	<u>100.00</u>
Single house	702,817	63.69
Duplex	58,507	5.30
Apartment/accesoria/condominium/ row house/etc.	250,576	22.71
Improvised (barong-barong)	77,119	6.99
Commercial/industrial/agricultural	12,478	1.13
Other housing unit: natural shelter, boat, etc.	963	0.09
Hotel, lodging house, dormitory, etc.	286	0.02
Institutional (hospital, convent, school dormitory, etc.)	561	0.05
Other collective living quarters (military camp, etc.)	256	0.02

## A BRIEF ANALYSIS

### TYPE OF OCCUPANCY

The biggest proportion of the households in Metropolitan Manila are occupying their dwelling units as tenants/lessees (45.60%) and as owners (42.36%). A little over one-tenth (10.41%) enjoy free rent and only 1.63 percent are subtenants or sublessees.

### CONSTRUCTION MATERIALS OF ROOF AND OUTER WALLS

A big majority of the households (88.56%) live in dwelling units roofed with galvanized iron/aluminum; 7.11 percent, with makeshift/salvaged materials; 2.61 percent, with tile/concrete/brick/stone; 0.92 percent, with cogon/nipa; 0.74 percent, with asbestos and 0.06 percent, with other materials such as anahaw.

Most of the households (42.12%) occupy dwelling units which have mixed tile/concrete/brick/stone and wood/plywood outer walls. Wood/plywood enclose the dwelling units of 32.59 percent; tile/concrete/brick/stone, 13.85 percent; makeshift/salvaged materials, 7.66 percent; galvanized iron/aluminum, 3.09 percent; bamboo/sawali, 0.45 percent; cogon/nipa, 0.15 percent; asbestos, 0.06 percent and other materials such as anahaw, 0.03 percent.

### YEAR BUILT

A little over one-fifth (21.02%) of the households are occupants of buildings constructed within the period 1976-80; 18.57 percent, 1971-1975; 28.77 percent, 1961-1970; 18.05 percent, 1951-1960 and 7.82 percent, 1942-1950. Only 5.77 percent live in structures built before World War II.

### FLOOR AREA OF DWELLING UNIT

Dwelling units measuring less than 30 square meters in floor area are being occupied by almost half of the total households (46.71%). Nearly one-fourth (23.84%) reside in dwelling units with floor area of 30-49 square meters; 10.20 percent, 50-69; 7.34 percent, 70-99; 5.36 percent, 100-149 and 6.55 percent, 150 and over.

### TENURE OF OWNER-OCCUPANT WITH RESPECT TO THE LAND

Over three-fifths (62.80%) of the 467,436 households occupying their dwelling units as owners also own the land occupied by their abodes; lessees or sublessees constitute 15.08 percent; farm lessees or agricultural tenants of landowners, 0.58 percent and those enjoying other legal tenure, 4.72 percent. A substantial 16.82 percent have no tenure at all (squatters, etc.). Eight out of 10 landowners (82.81%) have single-house owned units.

### SOURCE AND USE OF WATER SUPPLY

The faucet, community water system is the most common source of water supply in the NCR, irrespective of water use, followed by tubed or piped deep well. More than four-fifths (82.03%) of all households in the region depend on the faucet, community water system for their drinking water; 76.74 percent, water for kitchen use and 74.41 percent, water for washing their clothes. Tubed or piped deep well provides 15.39 percent of all households with water for drinking; 19.34 percent, for kitchen use and 20.82 percent, for laundry. Tubed or piped shallow well supply 1.84 percent with water for drinking; 2.65 percent, for kitchen use and 3.04 percent, for washing. Dug wells, improved and others, are the sources of drinking water for 0.63 percent; water for kitchen use, 1.14 percent; laundry water,

## A BRIEF ANALYSIS

1.56 percent. Springs, improved or others, provide water for drinking to 0.10 percent of the households; 0.12 percent, for kitchen use and 0.14 percent, for washing clothes. Rain, lake, river, stream, irrigation and others are the least resorted to sources of water supply.

### KIND OF LIGHTING FACILITIES

About ninety-three percent of all households illuminate their dwelling units by electricity; 6.33 percent, kerosene; 0.58 percent, liquefied petroleum gas; 0.04 percent, oil and 0.12 percent, others.

### COOKING FUEL

Liquefied petroleum gas (LPG), used by 46.14 percent of all households, is the most common cooking fuel. It is followed by kerosene, 30.46 percent; electricity, 15.18 percent and wood or charcoal, 7.92 percent. A small 0.30 percent utilize other kinds of cooking fuel.

### TOILET FACILITIES

As expected, the use of water-sealed toilets in Metropolitan Manila is widespread. The proportion of households using these modern toilet facilities is 86.13 percent, and distributed as follows: 49.87 percent have exclusive use of water-sealed toilets with sewer/septic tank; 21.62 percent share with other household(s) the use of this toilet facility; 6.06 percent have exclusive use of water-sealed toilets with other depository, and 8.58 percent share with other household(s) the use of said facility. Closed pit (antipolo system, etc.) is being used by 3.56 percent of the total households; open pit, 1.52 percent and other (pail system, etc.), 2.16 percent. A big number or 6.63 percent have no toilet at all.

### OWNERSHIP OF RADIO, TELEVISION SET AND REFRIGERATOR/FREEZER

More than three-fourths (78.02%) of the total households own radios, 56.24 percent have television sets and 44.84 percent have refrigerators or freezers. The NCR easily has more widespread ownership of television sets and refrigerators or freezers than any other region of the country.

CERTIFICATION																																		
<p>I HEREBY CERTIFY that the data set forth in this form were personally obtained by me in accordance with the rules and regulations promulgated by the National Census and Statistics Office.</p> <p>Name of person accomplishing this form (Printed Name &amp; Sign)</p> <p>Title _____ Date _____ 1980</p>																																		

**PERSONS TO BE ENUMERATED AS MEMBERS OF COLLECTIVE HOUSEHOLDS**

**1. HOTELS, LODGING HOUSES, DORMITORIES, ETC.**

- a. Proprietor, manager and employees living in the establishment, except those living therein with their own families and those who usually go home to their respective families at least once a week.
- b. Permanent lodgers/boarders (those who have stayed or expect to stay for one year or longer) and those temporary lodgers/boarders who have stayed for six months or longer as of May 1, 1980 or have been away from their own families for the same period. However, exclude those who usually go home at least once a week.
- c. Lodgers/boarders who are not residents of the Philippines and who have been in the Philippines for one year or longer as of May 1, 1980, or expect to stay in the Philippines for one year or longer. However, exclude those who have temporary place of residence elsewhere in the Philippines to where they usually go home. Exclude also diplomatic representatives or UN, ILO or USAID officials who, like diplomatic representatives, are subject to reassignment to other countries after their tour of duty in the Philippines, and members of their families.

**2. HOSPITALS AND NURSES' HOMES**

- a. All patients, including those just confined, in mental hospitals, leprosaria or leper colonies, pavilions of tuberculosis sanatoria where patients stay more or less permanently, and rehabilitation centers for drug addicts.
- b. Patients who have been confined for six months or longer as of May 1, 1980 in other kinds of hospitals and in wards for temporary confinement in tuberculosis sanatoria.
- c. Nurses in nurses' homes who do not usually go home at least once a week.
- d. Staff members and employees living in hospitals/nurses' homes, except those living therein with their families and those who usually go home at least once a week.

**3. WELFARE INSTITUTIONS (Homes for the Aged and Infirm, Orphanage, Boys' Town, etc.)**

- a. All inmates or wards, including those just confined.
- b. Staff members and employees living in the institutions, except those living therein with their families and those who usually go home at least once a week.

**4. CORRECTIVE AND PENAL INSTITUTIONS**

- a. All prisoners in national prisons and reformatories (welfareville).
- b. Prisoners and detainees in provincial or city/municipal jails who have been continuously confined for six months or longer, including confinement elsewhere, as of May 1, 1980, or those whose sentence is for six months or longer even if the sentence is on appeal.
- c. Staff members and employees living in the institutions except those living therein with their own families and those who usually go home at least once a week.

**5. CONVENTS, NUNNERIES, SEMINARIES, AND BOARDING SCHOOLS**

- a. Monks, priests, ministers, nuns, seminarists etc. However, priests or ministers of sects other than the Roman Catholic Church who live in the convent or house close to church or chapel with their own families are to be excluded (private households).
- b. Students in boarding schools (schools where students are required to stay in the school campus).
- c. Staff members, employees and helpers living in the premises, except those living therein with their own families and those who usually go home at least once a week.

**6. MILITARY CAMPS AND STATIONS (PC, Army, Air Force and Navy): PMA**

- a. Officers and enlisted men/draftees, except those who live in the premises with their own families and those who usually sleep most nights with private households or in hotels, lodging places or dormitories. Include those belonging to the unit in the camp or station who are away on military operation or mission or aboard naval vessels, except those whose families are living in the camp or station (their own families will report them).
- b. PMA cadets and trainees whose training is for six months or longer.
- c. Detainees who have been continuously confined for six months or longer, including confinement elsewhere, as of May 1, 1980.
- d. Civilian employees living in the camp or station, except those living therein with their own families and those who usually go home at least once a week.

**7. LOGGING, MINING AND CONSTRUCTION/PUBLIC WORKS CAMPS; PLANTATIONS AND AGRICULTURAL/FISHERIES EXPERIMENTAL OR BREEDING STATIONS, ETC.**

- a. Proprietor, manager, contractor and employees who do not live with their families in the premises and are supplied lodging (beddings, etc) and/or meals by the company, firm, contractor or agency, except those who usually go home at least once a week.

**8. OCEAN-GOING AND INTERISLAND/COASTAL VESSELS OR DEEP-SEA FISHING VESSELS**

- a. Filipino crew members of ocean-going vessels (whose own families live in the Philippines) at port as of 12:01 A.M. May 1, 1980, except those who usually go home to their own families in the Philippines at least once every six months.
- b. Any crew member of interisland/coastal vessel or deep-sea fishing vessel at port on any day during the enumeration, if the crew member has no home other than the vessel.

**9. REFUGEE CAMPS**

- a. Filipino citizens working and living inside the camps
